DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1,8,10,11, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baker in view of Michlin.

Baker discloses all of the subject matter set forth in the claims except for the use of an adapter to engage the work piece. Michlin discloses the use of an adapter to secure a workpiece. It would have been obvious to a skilled artisan at the time of the invention to provide Baker with the adapter (29) of Michlin to improve the connection between the driving spindle and the workpiece and to accommodate workpieces of different sizes.

With respect to claim 8, baker shows an "engagement body" (21).

*With respect to claim 13, it would have been obvious to one having ordinary skill in the art at the time the invention was made to used the claimed ranges, since it has been

held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Allowable Subject Matter

Claims 2-7,9,15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
